FOREWORD

This publication provides the user with statistical information on Ontario's foreign trade, classified respectively by countries, by commodity sections and by industry sectors, with an emphasis on trade in manufactured goods.

All statistical tables, unless specified otherwise, have been compiled by the Ministry of Industry and Tourism from data provided by Statistics Canada. The statistical section is preceded by a brief overview of world trade and a highlight of Canadian and Ontario exports and imports in 1980.

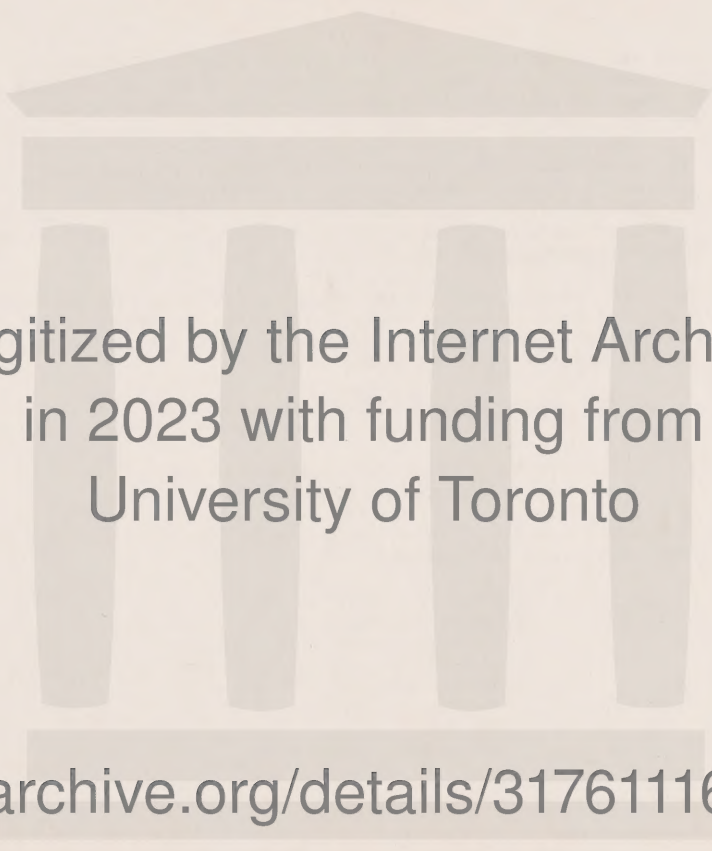

The terms "Ontario exports" and "Ontario imports" are used throughout this publication to denote respectively those portions of Canadian exports and Canadian imports which correspond to the following definitions by Statistics Canada:

1. Ontario Exports - Canadian exports reported to have had Ontario as the province of lading
2. Ontario Imports - Canadian imports reported to have had Ontario as the province of clearance.

1. World Trade

The value of world trade in 1980 reached US\$2,003 billion, recording a 22 percent increase over that of 1979. Real increase expressed in volume was only 1.5 percent, the smallest in the past two decades.

Table 1World Exports 1978 - 1980

Trade within the world's market economies increased at 20.6 percent per year from 1970 to 1980. The largest increases during those ten years were seen in the imports and exports of OPEC countries, respectively in excess of 30 percent per annum. As a result, OPEC's share of world exports (excluding those of centrally planned economies) rose spectacularly from 6 percent in 1970 to 17 percent in 1980, and its share of imports from three percent to seven percent.

Exports from the non-OPEC developing countries increased at a rate comparable to the world average, and consequently their share of world exports remained at 13 percent in 1980 as it was a decade before. Their share in world imports rose from 17 percent to 19 percent during the ten years.

The developed countries recorded lower growth rates in exports and imports compared with the developing countries. Consequently, their share in exports declined from 81 percent in 1970 to 70 percent in 1980.

Canadian exports increased by 16 percent in 1980 to reach \$75,964 million, and Canadian imports by 10 percent to \$68,979 million. The rates of increase measured in current dollars were moderate compared with those of the previous year, namely 24 percent for exports and 25 percent for imports.

Measured in terms of 1971 constant dollars, Canadian exports declined by 1.1 percent in 1980, and imports by 5.7 percent, from the levels attained respectively in 1979. The net decreases in the volume of Canada's trade were the first since 1975, reflecting the impact of economic slowdowns in North America, Western Europe and Japan.

Statistics by the International Monetary Fund (IMF) reveal that Japan's share of world exports rose from 6.8 percent in 1970 to 7.1 percent in 1980. In the same period, the share by the United States declined from 15.3 percent to 12 percent, and West Germany from 12.1 percent to 10.4 percent

In the nine years prior to 1980, Canada's trade deficits in fully manufactured goods (end products inedible) had increased at an annual growth rate of 22 percent. The increase in 1979 alone was 39 percent, raising the deficits from \$11.5 billion to \$16 billion.

In 1980, however, the deficits managed to remain on the \$16 billion level, making only a marginal increase of 2.2 percent to \$16,355 million. Trade with the United States was responsible for 77 percent of these deficits.

The United States accounted for 63 percent of Canadian exports and 70 percent of imports in 1980. Japan, the United Kingdom, West Germany and the Soviet Union were the next largest markets for Canadian exports accounting for 14 percent. Seventy-seven percent of Canada's total exports in 1980 were shipped to these five countries.

The four largest suppliers to Canada, after the United States, were Japan, Saudi Arabia, Venezuela and the United Kingdom, accounting for 14 percent of Canadian imports. In other words, 84 percent of Canada's total imports in 1980 came from these five largest suppliers.

For detailed statistics on Canadian exports and imports by countries and by commodities, the reader is advised to refer to publications from Statistics Canada, External Trade Series 65-001 through 65-203.

3. Ontario's Foreign Trade

a. General Review

Ontario's exports increased by 10 percent in 1980 to reach \$29.5 billion, and imports by five percent to \$37.7 billion. (See Forward for definitions of "Ontario exports" and "Ontario imports" as used in this publication).

Ontario was accountable for 30 percent of goods exported by Canada, and 55 percent of goods imported by this country in 1980. Ontario's balance of trade was \$8.2 billion in deficit in 1980 as compared with a surplus of \$7.0 billion in the total trade balance of Canada.

b. Ontario Exports

Ontario exports to the United States totalled \$22,637 million in 1980, and accounted for 77 percent of goods exported to all countries by this province. In comparison, only 53 percent of exports from the rest of Canada was destined for the United States in the same year.

Six other countries to which Ontario exported more than \$250 million during the year were the United Kingdom, West Germany, Belgium-Luxembourg, Netherlands, France and Venezuela, totalling \$3.2 billion and accounting for 11 percent of total Ontario exports. The rest of the world is responsible for the remaining 12 percent. (See Statistical Section for details of Ontario exports by countries.)

Over one-half of Ontario exports were inedible end products, and 58 percent of

these fully-manufactured exports were automobiles and automotive parts. At \$8.6 billion, the value of automotive products shipped to the United States alone was equivalent to 89 percent of all automotive exports, 51 percent of all end product exports and 29 percent of all exports shipped to the world by Ontario.

The value also constituted 64% percent of all inedible end products and 38 percent of all goods exported to that country by Ontario during the year. (See Statistical Section for details of Ontario Exports by Commodity Section.)

Leading export commodities in each of the commodity sections and their relative importance within the respective sections are shown in the following:

Analyses of Ontario exports by 106 manufacturing industries reveal that the automobile and auto parts industries were accountable for 36 per cent of all manufactured goods exported by this province in 1980. Seventeen other industries, each exporting more than \$200 million, contributed another 44 per cent, and the remaining 87 industries 20 per cent. (See Statistical Section for details of Ontario exports by industries.)

c. Ontario Imports

The United States maintained its 85 per cent share of Ontario imports in 1980, measured in terms of goods cleared at points located in this province. The United Kingdom, Japan, West Germany, Switzerland and Hong Kong were the next five largest suppliers, accounting for another seven per cent.

Altogether, more than 94 per cent of Ontario imports came from the countries of developed market economies, and less than six per cent from the developing countries. Developing countries which supplied more than \$100 million each were Taiwan, Hong Kong, South Africa and Brazil, accounting for 2.3 per cent of Ontario imports. (See Statistical Section for details of Ontario imports by countries.)

Inedible end products made up more than 64 per cent of Ontario imports, compared with 49 per cent for the rest of Canada. Automotive imports from the United States alone accounted for over 26 per cent of Ontario imports, but less than six for the other provinces. The value of U.S. automotive products imported into Ontario in 1980 was \$9.9 billion, more than five times as high as that of the rest of Canada.

Nearly all the \$8 billion deficit incurred by Ontario in its overall trade balance in 1980 was attributable to the inedible end products section, where imports of \$24.2 billion exceeded exports of \$16.7 billion by \$7.5 billion. Ontario's balance of automotive trade with the United States showed a deficit of \$1,278 million in 1980, which is a slight improvement over the \$1,433 million deficit recorded in the previous year.

More than one-half of semi-manufactured goods and nearly two-thirds of fully manufactured goods imported by Canada in 1980 were destined for Ontario. (See Statistical Section, Table II-B for details of Ontario imports by commodities.)

Leading commodities imported into Ontario and their percentages within the respective commodity sections are listed in the following table:

Leading Ontario Imports Classified
By Corresponding Ontario Industries 1980

The 1980 data on Ontario-cleared imports, tabulated by Statistics Canada according to the Import Commodity Classification (MCC) code, have been processed and analyzed by the Ministry of Industry and Tourism and regrouped according to the Standard Industrial Classification (SIC) to produce the results shown as the "Canadian and Ontario Imports by Industrial Sector" in the Statistical Section of this publication.

The value of Ontario imports listed for each industry is not to be interpreted as the value of goods imported or used by that industry in Ontario, although a varied portion of the imports may have been. A more appropriate interpretation would be to equate it with the value of goods for which each corresponding Ontario industry could have provided a domestic supply if it had possessed all the necessary resources to do so. The resulting data are, in this context, suggestive to those who are interested in the relative size of import replacement market for each of the 162 Ontario industries. (108 3-digit SIC industries and 54 4-digit SIC industries).

Seventy-eight per cent of Ontario's \$31.5 billion manufactured imports belonged to the following 20 industries:
